ROBERT F PEPIN
REGION 5 TMDL COORDINATOR

George V. Voinovich
Governor
Donald R. Schregardus
Director

Mr. Kenneth Fenner, Chief
Water Quality Branch
U.S. EPA - Region 5
77 West Jackson Blvd.
Chicago, IL 60604

October 22, 1992

WQ16J

Dear Mr. Fenner:

I am pleased to submit the TMDL list for the State of Ohio as required by 40 CFR part 130.7(d)(1) as amended on July 24, 1992. This list was developed based on an evaluation of the following readily available information sources:

1. waters identified in the Ohio Water Resource Inventory 305(b) Report as being water quality limited
2. waters for which dilution calculations indicated non-attainment of applicable WQS (via the NPDES permit list)

The list is presented in two sections. The first section includes all the projects in the state which will require TMDL development. The second section is a list of the water bodies targeted for TMDL development within the next two years. The second section is prioritized based on the level of aquatic degradation (where assessed) and by the WQBEL or WLA due date. This list is consistent with the Agency's basin approach, WQBEL list, and the FFY 93 Major Permit list. The TMDLs on this list will report only the WLA portion of the analysis for all of these projects except one. The Bokes Creek TMDL will assess both point and non-point impacts.

If you have any questions regarding the development of this list, please contact Mr. Seif Amragy at (614) 644-2856.

Sincerely,

Ava Hottman, Acting Division Chief
Division of Water Quality Planning and Assessment

DESCRIPTION OF TMDL TABLES

The Ohio TMDL List is a list of all Ohio waterbodies which will require TMDL development. It is based on waterbody information compiled in the development of the Ohio Water Resource Inventory 305(b) Report and includes all water quality limited segments. The aquatic life use and status are presented along with the suspected causes of degradation (eg. metals, ammonia).

The Ohio FFY 93-94 TMDL Priority List is a prioritized list of all waterbody segments which are targeted for TMDL development within the FFY 1993 through FFY 1994 period. It is based on the Ohio Water Resource Inventory 305(b) Report waterbody information as well as the Major Permit List for FFY 1993 and the WQBEL Schedules for FFY 1993 and FFY 1994. All waterbody segments which include discharge(s) from these lists were included. Several segments without dischargers but with significant non-point source impacts were also included.

The waterbodies are listed in highest to lowest priority based on the Degradation Index, an indicator of aquatic life degradation based on the IBI and ICI indices for evaluated segments. Higher Degradation Indices indicate greater aquatic life degradation. For segments which have not had aquatic life assessments, priority was based on the WQBEL or WLA due dates for dischargers on the segment.

KEY TO TABLES

Aquatic Life Use Status:

- F = aquatic life use fully attained
- N = aquatic life use not attained
- P = aquatic life use partially attained
- T = aquatic life use attained but threatened

Aquatic Life Use Type:

- WWH = warmwater habitat
- LWH = limited warmwater habitat
- MWH = modified warmwater habitat
- CWH = coldwater habitat
- EWH = exceptional warmwater habitat

Causes of Degradation:

- 00 cause unknown
- 01 unknown toxicity
- 02 pesticides
- 03 priority organics
- 04 non priority organics
- 05 metals
- 06 ammonia
- 07 chlorine
- 08 other inorganics
- 09 nutrients
- 10 pH
- 11 siltation
- 12 organic enrichment / D.O.
- 13 salinity / TDS / chloride
- 14 thermal modification
- 15 flow alteration
- 16 habitat alteration
- 17 pathogen indicators
- 18 radiation
- 19 oil and grease
- 20 taste and odor
- 21 suspended solids
- 22 noxious aquatic plants
- 23 filling and draining
- 24 total toxics

Significance of Causes:

- (H) = high
- (M) = moderate
- (S) = small
- (T) = threatened
